

Summary of the SK peer-review report:

The peer review of the Slovakian NCCA was able to evaluate all aspects related to the implementation of the CSA. A number of the activities are not yet operational in the NCCA-SK as at the moment of the review one CAB has an accreditation at the level substantial, but no certificates are yet emitted.

For the aspects already in operation at the NCCA-SK, the implementation of the regulatory requirements could be confirmed. For the aspects that will become operational in the (near) future, some deficiencies were identified. The NCCA-SK provided an action plan that includes all elements to ensure that the implementation in line with the CSA provisions is planned in due time. This assurance is enhanced by the effective continuous improvement process that was demonstrated during the peer review.
